

STAY IN TOUCH FROM ALMOST ANYWHERE* WORK TAKES YOU

WELCOME TO SOFTWARE WITHOUT THE HARD COSTS

.....
Say goodbye to large up-front software costs and hello to innovation that can help drive your business productivity. T-Suite® lets you connect eligible staff to world-class business software for a monthly fee whether they log on in the office, at home or from a client's site*. It means they'll have easier access to up-to-date applications and business information. Better still, our range includes the latest software from leading providers like Microsoft®.

STAY IN TOUCH ON ALMOST ANY DEVICE, ANYWHERE

.....
Microsoft® Exchange Online is designed for organisations who want to get the benefits of cloud-based email without sacrificing the business-class capabilities of Exchange Server. Built on the same technology as Exchange Server 2010, Microsoft handles the ongoing maintenance, patches, and upgrades of the Exchange infrastructure while providing IT administrators the control and flexibility they require.

● Enterprise-grade email for everyone

Managing email on the move is easy with Exchange Online.

- Large 25 GB mailbox allowance per user to share over primary and archive mailbox
- Users can attach larger files
 - up to 25MB per email.
- Your business can use a domain email address, so you'll have the professional, established presence of being 'you@yourbusiness.com.au'.
- You'll have access to all the latest email capabilities, such as built-in archiving and, in Plan 2, 'Legal Hold' recovery which helps preserve users' deleted and edited mailbox items.

BUSINESS

MICROSOFT® EXCHANGE ONLINE

● Easily shared Calendars and Contacts

Help work as a tighter team by being able to view shared contacts and calendars, including meeting room bookings in order to check availabilities and schedule meetings smoothly.

● Mobile Access¹

Exchange Online is designed to work over a web connection on compatible devices* so you can access Exchange Online with automatically updated email, calendar, and contacts across a range of compatible mobile devices including iPhone™, Android™ phones, BlackBerry® smartphones², Microsoft

Windows Mobile®, and Windows® Phones. So your team can keep working with the compatible devices they already love.

● Advanced security to protect your staff, systems and time

– Built in anti-virus and anti-spam protection using Microsoft Forefront® Online Protection for Exchange

and Microsoft Forefront® Online Protection for Exchange Server.

- 99.9% service availability with service credits if service levels are not met³.
- Protection through geo-redundant data centres with advanced disaster recovery capabilities, plus robust security and privacy controls and standards.

● Pay-as-you-go-user licensing

You'll be able to enjoy added purchasing flexibility and cost control, plus robust management and deployment tools, to adapt to your changing business needs with complete IT control.

* Subject to internet availability or mobile network coverage. 1. Access from mobile devices depends on carrier network availability. 2. Users of BlackBerry® Internet Service get push email and can add calendar and contacts to their BlackBerry device through a wired sync with Outlook on the PC. 3. Service levels do not apply during excluded downtime (being downtime less than 10 minutes in length) and scheduled downtime. Refer to Telstra's T-Suite Our Customer Terms for information on the service levels, the exclusions, and how to claim service credits. 4. If you wish to implement the hosted voicemail (unified messaging) service feature, you must engage your PABX provider or a certified Microsoft partner to assist you. If you choose to implement the hosted voicemail (unified messaging) service feature, you understand that we will not support your implementation or ongoing use of the hosted voicemail (unified messaging) service feature. You may require additional hardware and/or PBX configuration services to implement and use the hosted voicemail (unified messaging) service feature. It is your responsibility to acquire all required hardware and configuration services. 5. Service levels do not apply during excluded downtime (being downtime less than 10 minutes in length) and scheduled downtime. Refer to Telstra's T-Suite Our Customer Terms for information on the service levels, the exclusions, and how to claim service credits. 6.
